SUMMARY

Cybersecurity Analyst with experience in high-volume SOC operations, security monitoring, and incident response within a large-scale government environment. Skilled in SIEM analysis, log correlation, threat hunting, and detection tuning using enterprise security tools. Experienced in supporting compliance and security governance, with a focus on advancing toward cloud and security engineering roles.

WORK EXPERIENCE

Security Operations Center (SOC) Analyst December 2025-Present
Virginia Department of Transportation

- Investigate and triage 40+ daily security alerts (medium to critical severity) within a large-scale statewide environment, ensuring timely threat detection and response.
- Independently resolve ~95% of alerts, performing full-lifecycle analysis and escalating complex incidents when necessary.
- Perform log analysis across DNS, Windows Event Log, Linux systems, and endpoint/network telemetry to validate suspicious activity and determine root cause.
- Utilize Splunk Enterprise Security, CrowdStrike Falcon, Forescout, and Symantex Endpoint Security for monitoring, detection, and incident response.
- Conduct threat hunting and IOC enrichment using VirusTotal, identifying malicious IPs, domains, file hashes, and attack activity including brute-force and spoofing attempts.
- Develop and tune Splunk detection rules, apply structured 5 W's analysis, and align investigations with National Institute of Standards and Technology and MITRE ATT&CK methodologies.

Information Security Analyst August 2024- August 2025
Virginia Department of Health

- Developed and maintained System Security Plans (SSPs) and governance documentation to support audit readiness and regulatory compliance initiatives.
- Conducted Security Control Assessments to identify implementation gaps and recommended remediation strategies to improve organizational risk posture.
- Reviewed and processed 1,000+ software installation requests, ensuring compliance with security policies, access controls, and approved software standards.
- Assisted in risk and compliance analysis by evaluating security documentation, control effectiveness, and policy adherence across enterprise systems.

EDUCATION

Bachelor of Science in Management Information Systems Aug 2021 - May 2025
Virginia Commonwealth University, Richmond VA.

SKILLS

Security Tools	Splunk Enterprise Security, CrowdStrike Falcon, Forescout, Tenable, ServiceNow
Threat Intelligence	VirusTotal, WHOIS
GRC/Compliance	NIST, HIPAA, ClearAsset
Systems	Windows, Linux, DNS, Active Directory
Programming	Python, SQL, Splunk (SPL), Java, C#
Languages	Vietnamese (Fluent), English (Fluent)

CERTIFICATES

ISC² Certified in Cybersecurity (CC) April 2026
